

# Standard Microchip

- A disposable, single-use, ergonomic syringe with a microchip inside for its use and application in pets and horses
- Made of high-quality steel and plastic materials
- All microchips are ISO compliant: ISO 11784/5
- Anti-Drop system, which ensures the microchip will remain inside the needle until it is implanted
- Coated with the biocompatible, anti-migration material, parylene
- Available in bags of 25 or boxes of 100

### **Pet ID tags available with every standard microchip**

Because tags are proven to increase the chances of a pet reuniting with its family, tags are available with every 24Petwatch microchip.

### **Register microchips for free with the 24Petwatch registry**

Registered 24Petwatch microchips continue to be the best chance to identify a lost pet, and accompanied by our lost pet recovery services are the best way to help them find their way home.
